## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 11 is objected to because of the following informalities: "produce-code" should be "product-code". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. Claims 6, 11, 19, 21, 23, 25, 27 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,311,522 to Murakami (hereafter "Murakami").

Reference is hereby made to Fig. 3C of Murakami, which shows a group of six product-coded blocks, each product-coded block serving as one of "a plurality of arrangements of data" and consisting of "a product code according to a code V and a code H", with each inner code block being a "code-H codeword". Recording and reproduction of the group of coded blocks is apparently performed row-wise across the group of six product-coded blocks and thus "in a codeword-by-codeword manner in an alternating fashion for said plurality of product-code codewords". Each product-coded block may be equated to a "sector." Data of ID words apparently exists at a constant ("predetermined") interval in Murakami's recorded data, as each row of each product-coded block begins with an ID word.

### ***Allowable Subject Matter***

3. Claims 1, 8, 18, 20, 22, 24, 26 and 28 are allowed.

### ***Response to Arguments***

4. Applicant's arguments filed 20 July 2005 have been fully considered but they are not persuasive.

The Murakami patent shows ID data in inner codes of ECC product codes (see again FIG. 3C), thus it is incorrect for applicant to suggest that "the ID is not coded".
